Toxicology, 69 (1991) 349–352
Elsevier Scientific Publishers Ireland Ltd.

TOXICOLOGY

SUBJECT INDEX

Volume 69 (1991)

absorption, paraquat, toxicity, sodium dextran sulfate, potassium polyvinyl sulfate, mouse, 93
acetaminophen, glutathione, phenylephrine, clonidine, adrenoceptors, 279
acetylcholinesterase, organophosphate, oxime, direct effect, crotylsarin, survival, neuromuscular transmission, 331
adrenals, chlordimeform, adrenoreceptors, corticosterone, adrenocorticotropic hormone, pituitary, 257
adrenoceptors, glutathione, phenylephrine, clonidine, acetaminophen, 279
adrenocorticotropic hormone, chlordimeform, adrenoreceptors, corticosterone, adrenals, pituitary, 257
adrenoreceptors, chlordimeform, corticosterone, adrenocorticotropic hormone, adrenals, pituitary, 257
age-related effects, lead toxicity, testes, sperm production rate, 269
alkanes, 2,6,10,14-tetramethylpentadecane (pristane), β-cyclodextrin, inclusion complex, plasmacytoma, 301
alkylated polychlorinated dibenzofurans, antiestrogens, female rat uterus, 187
alpha tocopherol, cadmium, alpha tocopheryl succinate, hepatocytes, cytoprotection, toxicity, 63
alpha tocopheryl succinate, cadmium, alpha tocopherol, hepatocytes, cytoprotection, toxicity, 63
amino acid transport, epithelial cell membranes, rabbit kidney, rat jejunum, mercury, cadmium, 177
antiestrogens, alkylated polychlorinated dibenzofurans, female rat uterus, 187
arsenic, endothelial cell injury, reduced glutathione (GSH), prostacyclin, 101

behaviour, PCB, 3,3′,4,4′-tetrachlorobiphenyl, neurotoxicity, cholinergic muscarinic receptors, mouse, 27
Bis(2-chloroethyl)sulphide, sulphur mustard, lipid peroxidation, flavonoids, gossypin, hydroxyethyl rutoside, 35
Bowman-Birk inhibitor, protease inhibitor, cancer chemoprevention, mouse lung, 165

cadmium, alpha tocopherol, alpha tocopheryl succinate, hepatocytes, cytoprotection, toxicity, 63
cadmium, amino acid transport, epithelial cell membranes, rabbit kidney, rat jejunum, mercury, 177
cadmium, selenium, glucose output, glutathione, hepatocyte viability, 111
cancer chemoprevention, protease inhibitor, Bowman-Birk inhibitor, mouse lung, 165
cerium (Ce), liver injury, cytochrome *P*-450, coumarin 7-hydroxylase (COH), 7-ethoxyresorufin *O*-deethylase, 1
chlordimeform, adrenoreceptors, corticosterone, adrenocorticotropic hormone, adrenals, pituitary, 257
cholinergic muscarinic receptors, PCB, 3,3′,4,4′-tetrachlorobiphenyl, neurotoxicity, behaviour, mouse, 27
cisplatin, rat, distal tubule, electron microscopy, renal kallikrein, 121
clonidine, glutathione, phenylephrine, acetaminophen, adrenoceptors, 279
cocaine, cultured rat hepatocytes, glutathione, lipid peroxidation, mechanisms of cytotoxicity, reactive oxygen species, 79
contact sensitization, predictive tests, guinea pig and mouse, local lymph node assay, lymphocyte proliferation, 209
copper, sex differences, nickel, zinc, 133
copper, valproic acid, metallothionein, zinc, mouse liver, 143
corticosterone, chlordimeform, adrenoreceptors, adrenocorticotropic hormone, adrenals, pituitary, 257
coumarin 7-hydroxylase (COH), cerium (Ce), liver injury, cytochrome *P*-450, 7-ethoxyresorufin *O*-deethylase, 1
crotylsarin, organophosphate, oxime, direct effect, acetylcholinesterase, survival, neuromuscular transmission, 331
cultured rat hepatocytes, cocaine, glutathione,

lipid peroxidation, mechanisms of cytotoxicity, reactive oxygen species, 79
β-cyclodextrin, 2,6,10,14-tetramethylpentadecane (pristane), alkanes, inclusion complex, plasmacytoma, 301
cytochrome *P*-450, cerium (Ce), liver injury, coumarin 7-hydroxylase (COH), 7-ethoxyresorufin *O*-deethylase, 1
cytoprotection, cadmium, alpha tocopherol, alpha tocopheryl succinate, hepatocytes, toxicity, 63

D-DCVC, *S*-(1,2-dichlorovinyl)-D-cysteine, nephrotoxicity, proximal tubular toxins, halogenated hydrocarbons, dogs, 151
delayed ossification, pyridostigmine bromide, rats, reproductive toxicity, developmental toxicity, 291
developmental toxicity, pyridostigmine bromide, rats, reproductive toxicity, delayed ossification, 291
direct effect, organophosphate, oxime, acetylcholinesterase, crotylsarin, survival, neuromuscular transmission, 331
distal tubule, cisplatin, rat, electron microscopy, renal kallikrein, 121
DNA damage, peroxisome, hydrogen peroxide, hepatocarcinomas, 55
dogs, *S*-(1,2-dichlorovinyl)-D-cysteine, D-DCVC, nephrotoxicity, proximal tubular toxins, halogenated hydrocarbons, 151
dopamine, lindane, γ-hexachlorocyclohexane, suckling rats, noradrenaline, serotonin, 43

electron microscopy, cisplatin, rat, distal tubule, renal kallikrein, 121
endothelial cell injury, arsenic, reduced glutathione (GSH), prostacyclin, 101
epithelial cell membranes, amino acid transport, rabbit kidney, rat jejunum, mercury, cadmium, 177
7-ethoxyresorufin *O*-deethylase, cerium (Ce), liver injury, cytochrome *P*-450, coumarin 7-hydroxylase (COH), 1

fatty acid composition, rat liver, 199
female rat uterus, alkylated polychlorinated dibenzofurans, antiestrogens, 187
flavonoids, sulphur mustard, bis(2-chloroethyl) sulphide, lipid peroxidation, gossypin, hydroxyethyl rutoside, 35

glucose output, cadmium, selenium, glutathione, hepatocyte viability, 111
γ-glutamyltranspeptidase, methylmercury, renal uptake, mice strain and sex differences, glutathione, 317
glutathione, cadmium, selenium, glucose output, hepatocyte viability, 111
glutathione, cocaine, cultured rat hepatocytes, lipid peroxidation, mechanisms of cytotoxicity, reactive oxygen species, 79
glutathione, methylmercury, renal uptake, mice strain and sex differences, γ-glutamyltranspeptidase, 317
glutathione, phenylephrine, clonidine, acetaminophen, adrenoceptors, 279
gossypin, sulphur mustard, bis(2-chloroethyl) sulphide, lipid peroxidation, flavonoids, hydroxyethyl rutoside, 35
guinea pig and mouse, contact sensitization, predictive tests, local lymph node assay, lymphocyte proliferation, 209

halogenated hydrocarbons, *S*-(1,2-dichlorovinyl)-D-cysteine, D-DCVC, nephrotoxicity, proximal tubular toxins, dogs, 151
hepatocarcinomas, peroxisome, hydrogen peroxide, DNA damage, 55
hepatocytes, cadmium, alpha tocopherol, alpha tocopheryl succinate, cytoprotection, toxicity, 63
hepatocyte viability, cadmium, selenium, glucose output, glutathione, 111
γ-hexachlorocyclohexane, lindane, suckling rats, noradrenaline, serotonin, dopamine, 43
histopathology, solvent, vehicle, skin flap, viability, ultrastructure, 11
hydrogen peroxide, peroxisome, DNA damage, hepatocarcinomas, 55
hydroxyethyl rutoside, sulphur mustard, bis(2-chloroethyl)sulphide, lipid peroxidation, flavonoids, gossypin, 35

immunocompetence, 2,3,7,8-tetrachlorodibenzo-*p*-dioxin, 219
inclusion complex, 2,6,10,14-tetramethylpentadecane (pristane), alkanes, β-cyclodextrin, plasmacytoma, 301

lead toxicity, age-related effects, testes, sperm production rate, 269
lindane, γ-hexachlorocyclohexane, suckling rats, noradrenaline, serotonin, dopamine, 43
lipid peroxidation, cocaine, cultured rat hepatocytes, glutathione, mechanisms of cytotoxicity, reactive oxygen species, 79
lipid peroxidation, sulphur mustard, bis(2-chloroethyl)sulphide, flavonoids, gossypin, hydroxyethyl rutoside, 35

liver injury, cerium (Ce), cytochrome *P*-450, coumarin 7-hydroxylase (COH), 7-ethoxyresorufin *O*-deethylase, 1
local lymph node assay, contact sensitization, predictive tests, guinea pig and mouse, lymphocyte proliferation, 209
lymphocyte proliferation, contact sensitization, predictive tests, guinea pig and mouse, local lymph node assay, 209

mechanisms of cytotoxicity, cocaine, cultured rat hepatocytes, glutathione, lipid peroxidation, reactive oxygen species, 79
mercury, amino acid transport, epithelial cell membranes, rabbit kidney, rat jejunum, cadmium, 177
metallothionein, valproic acid, copper, zinc, mouse liver, 143
methylmercury, renal uptake, mice strain and sex differences, glutathione, γ-glutamyltranspeptidase, 317
mice strain and sex differences, methylmercury, renal uptake, glutathione, γ-glutamyltranspeptidase, 317
mouse, paraquat, toxicity, absorption, sodium dextran sulfate, potassium polyvinyl sulfate, 93
mouse, PCB, 3,3′,4,4′-tetrachlorobiphenyl, neurotoxicity, behaviour, cholinergic muscarinic receptors, 27
mouse liver, valproic acid, metallothionein, copper, zinc, 143
mouse lung, protease inhibitor, Bowman-Birk inhibitor, cancer chemoprevention, 165

nephrotoxicity, *S*-(1,2-dichlorovinyl)-D-cysteine, D-DCVC, proximal tubular toxins, halogenated hydrocarbons, dogs, 151
neuromuscular transmission, organophosphate, oxime, direct effect, acetylcholinesterase, crotylsarin, survival, 331
neurotoxicity, PCB, 3,3′,4,4′-tetrachlorobiphenyl, behaviour, cholinergic muscarinic receptors, mouse, 27
nickel, sex differences, zinc, copper, 133
noradrenaline, lindane, γ-hexachlorocyclohexane, suckling rats, serotonin, dopamine, 43

organophosphate, oxime, direct effect, acetylcholinesterase, crotylsarin, survival, neuromuscular transmission, 331
oxime, organophosphate, direct effect, acetylcholinesterase, crotylsarin, survival, neuromuscular transmission, 331

paraquat, toxicity, absorption, sodium dextran sulfate, potassium polyvinyl sulfate, mouse, 93
PCB, 3,3′,4,4′-tetrachlorobiphenyl, neurotoxicity, behaviour, cholinergic muscarinic receptors, mouse, 27
peroxisome, hydrogen peroxide, DNA damage, hepatocarcinomas, 55
phenylephrine, glutathione, clonidine, acetaminophen, adrenoceptors, 279
pituitary, chlordimeform, adrenoreceptors, corticosterone, adrenocorticotropic hormone, adrenals, 257
plasmacytoma, 2,6,10,14-tetramethylpentadecane (pristane), alkanes, β-cyclodextrin, inclusion complex, 301
potassium polyvinyl sulfate, paraquat, toxicity, absorption, sodium dextran sulfate, mouse, 93
predictive tests, contact sensitization, guinea pig and mouse, local lymph node assay, lymphocyte proliferation, 209
prostacyclin, arsenic, endothelial cell injury, reduced glutathione (GSH), 101
protease inhibitor, Bowman-Birk inhibitor, cancer chemoprevention, mouse lung, 165
proximal tubular toxins, *S*-(1,2-dichlorovinyl)-D-cysteine, D-DCVC, nephrotoxicity, halogenated hydrocarbons, dogs, 151
pyridostigmine bromide, rats, reproductive toxicity, developmental toxicity, delayed ossification, 291

rabbit kidney, amino acid transport, epithelial cell membranes, rat jejunum, mercury, cadmium, 177
rat, cisplatin, distal tubule, electron microscopy, renal kallikrein, 121
rats, pyridostigmine bromide, reproductive toxicity, developmental toxicity, delayed ossification, 291
rat jejunum, amino acid transport, epithelial cell membranes, rabbit kidney, mercury, cadmium, 177
rat liver, fatty acid composition, 199
reactive oxygen species, cocaine, cultured rat hepatocytes, glutathione, lipid peroxidation, mechanisms of cytotoxicity, 79
reduced glutathione (GSH), arsenic, endothelial cell injury, prostacyclin, 101
renal kallikrein, cisplatin, rat, distal tubule, electron microscopy, 121
renal uptake, methylmercury, mice strain and sex differences, glutathione, γ-glutamyltranspeptidase, 317
reproductive toxicity, pyridostigmine bromide,

rats, developmental toxicity, delayed ossification, 291

S-(1,2-dichlorovinyl)-D-cysteine, D-DCVC, nephrotoxicity, proximal tubular toxins, halogenated hydrocarbons, dogs, 151
selenium, cadmium, glucose output, glutathione, hepatocyte viability, 111
serotonin, lindane, γ-hexachlorocyclohexane, suckling rats, noradrenaline, dopamine, 43
sex differences, nickel, zinc, copper, 133
skin flap, solvent, vehicle, viability, histopathology, ultrastructure, 11
sodium dextran sulfate, paraquat, toxicity, absorption, potassium polyvinyl sulfate, mouse, 93
solvent, vehicle, skin flap, viability, histopathology, ultrastructure, 11
sperm production rate, lead toxicity, age-related effects, testes, 269
suckling rats, lindane, γ-hexachlorocyclohexane, noradrenaline, serotonin, dopamine, 43
sulphur mustard, Bis(2-chloroethyl)sulphide, lipid peroxidation, flavonoids, gossypin, hydroxyethyl rutoside, 35
survival, organophosphate, oxime, direct effect, acetylcholinesterase, crotylsarin, neuromuscular transmission, 331

testes, lead toxicity, age-related effects, sperm production rate, 269
3,3′,4,4′-tetrachlorobiphenyl, PCB, neurotoxicity, behaviour, cholinergic muscarinic receptors, mouse, 27
2,3,7,8-tetrachlorodibenzo-*p*-dioxin, immunocompetence, 219
2,6,10,14-tetramethylpentadecane (pristane), alkanes, β-cyclodextrin, inclusion complex, plasmacytoma, 301
toxicity, cadmium, alpha tocopherol, alpha tocopheryl succinate, hepatocytes, cytoprotection, 63
toxicity, paraquat, absorption, sodium dextran sulfate, potassium polyvinyl sulfate, mouse, 93

ultrastructure, solvent, vehicle, skin flap, viability, histopathology, 11
valproic acid, metallothionein, copper, zinc, mouse liver, 143

vehicle, solvent, skin flap, viability, histopathology, ultrastructure, 11
viability, solvent, vehicle, skin flap, histopathology, ultrastructure, 11
viability, solvent, vehicle, skin flap, histopathology, ultrastructure, 11

zinc, sex differences, nickel, copper, 133
zinc, valproic acid, metallothionein, copper, mouse liver, 143

Toxicology, 69 (1991) 353–354
